POINTS OF INTEREST:

Health Sciences EvCC is the lead in a \$4.8 million U.S. Department of Labor grant to train more than 700 students to become nurses and other health professionals. The college also partners with Providence Regional Medical Center, which provides funding, training, and experience for EvCC nursing students. EvCC broke ground in August 2011 on a new Healthcare Education Center, doubling the amount of space for healthcare education and providing a new home for the Providence Everett Healthcare Clinic, which provides health care to low-income patients.

Business and Industry EvCC partners with business and industry to train students for in-demand jobs, working closely with Boeing and other employers. The college has also increased its corporate and professional training offerings, including its Small Business Accelerator program, which provides custom coaching to business owners with 10-15 years of experience with the goal to help owners double the size of their businesses within five years.

ORCA Thirty students graduated from EvCC's Ocean Research College Academy in June, earning both their associate's degree and high school diploma. All graduates are continuing to four-year schools, 70 percent in STEM fields, with grads earning more than \$200,000 in scholarships. The unique program uses a cohort-based Running Start early college model with a focus on the local marine environment. The result is a high graduation rate and an exceptional transfer rate to top-tier institutions across the country.
