(within 9 months of program completion)

POINTS OF INTEREST:

Lake Washington Institute of Technology – A New Name

With the Governor's signature on SB 5664 we officially became Lake Washington Institute of Technology (formerly Lake Washington Technical College) on July 22, 2011. We remain dedicated to our mission – preparing students for today's careers and tomorrow's opportunities. We retain our dedication to workforce development and continue to be engaged in high quality, hands-on education that serves the needs of Washington's citizens. The new name recognizes that we have become a more comprehensive technical college and gives us the opportunity to enhance our impact on technical education and serve as a polytechnic in support of Washington industry. We continue to meet the needs of our community by offering students many pathways to achieve their career goals, including certificates, associate and applied bachelor's degrees.

Allied Health Building

On September 14, 2011, Lake Washington Institute of Technology celebrated the opening of our new 83,000 square-foot Allied Health Building. The 3-story, state-of-the-art, energy efficient facility houses programs in nursing, medical assisting, dental hygiene, physical therapist assistant, occupational therapy assistant, and the State's first funeral service education program. A new Washington Network for Innovative Careers (WaNIC) high school skills center focused on allied health careers is co-located in this new facility, providing a seamless transition of students from the skills center programs into our college programs.

Bachelor of Technology in Applied Design (BTAD)

In 2009, we introduced our first baccalaureate degree, the Bachelor of Technology in Applied Design (BTAD). The BTAD program brings together students who hold applied associate degrees from various design disciplines, including industrial, architectural and graphic design, to earn a bachelors degree while refining their design management skills. Our first graduates were awarded their diplomas on June 17, 2011.
