

preference. A default language can be set and any available localized languages can be accessed by appending country code to the end of the url (e.g. www.examplesite.co.uk is default English and www.examplesite.co.uk/de would render in German)

6.0 Financial Quote

The Squiz Digital Experience Platform subscription price is based upon platform utilization. We do not enforce a hard licensing requirement based upon the number of users.

The value metric for each product is driven by unique utilization (volume) indicators. A summary is provided below along with a listing of relevant tiers per product.

The term of any resulting contract may be 1 - 5 years. With one or two year renewal increments as required. Squiz will also limit price increases for the duration of the contract to a standard measure of inflation plus 2%.

Squiz Matrix CMS

Squiz Matrix CMS is the base product of our DXP. The subscription pay-per-use metric for Squiz Matrix is based on “content assets”. This means the cost of your license is based entirely upon how much content you store, edit, and publish (manage) in a Matrix system.

The following asset types are classified as “content asset types” in Matrix.

Asset Type Name	Category	Asset Type Name	Category
Standard Page	Page	MS Excel Document	File
News Item	Page	Custom Form	Form
Calendar Event	Page	E-Commerce Form	Form
Recurring Calendar Event	Page	Decision Tree	Form
File (<i>video, photo, audio, etc.</i>)	File	Online Quiz	Form
PDF File	File	Online Poll	Form
MS Word Document	File	Data Record	Data
MS PowerPoint	File		

Pricing Tiers

Matrix Asset # Breakpoints	5,000	10,000	25,000	50,000
Price Per Annum	\$23,000	\$28,800	\$34,500	\$51,800

Funnelback Search

Funnelback's only delimiting pricing factor is the size of the index *i.e.* the sum of unique assets, documents, urls, or records within the index. In Funnelback, these are all referred to as documents.

Index size breakpoints are: 10K, 25K, 50K, 100K, 250k

Pricing Tiers

Document Total Breakpoints	10,000	25,000	50,000	100,000	250,000
Price Per Annum	\$10,800	\$16,200	\$21,400	\$29,900	\$48,200

Squiz Connect Integration Platform

Connect, our iPaaS, is managed as a service by our product team. For an additional fee, customers can add access to the integrator UI. The subscription pay-per-use metric for Connect is integration flows *i.e.* each unique integration microservice or workflow.

Connect also has two premium add-ons:

- Access to the integrator for the customer's developers: **\$9,500**
- Additional production workspaces: **\$3,500**

Integration Flows	10	15	20
----------------------	----	----	----

Price Per Annum	\$16,000	\$22,000	\$27,500
-----------------	----------	----------	----------

Implementation fees

Implementation including content migration, design & development, configuration are quoted on a per-project time & materials basis. Squiz will offer all SBCTC system schools a \$200/hr rate for implementation services. A dedicated team and project manager will be assigned to each implementation.

Post - Project Service Pack

SBCTC system colleges may also choose to procure time with us on a more flexible and proactive basis, the benefit of this is being able to use the time however you wish over a 12-month period, and may see discounts on the blended rate depending upon the amount of time procured.

Service Pack Total Hours	Cost
56 Hour Service Pack	\$10,000
115 Hour Service Pack	\$20,000
265 Hour Service Pack	\$45,000
450 Hour Service Pack	\$75,000

Dedicated Hosting

The Squiz DXP includes Enterprise SaaS with an uptime guarantee of 99.9%. We host our platform in data centers within the United States and hold ISO27001 and SOC2 accreditation.

The Software as a Service offer, and usage based pricing, is only available hosted on Squiz' SaaS infrastructure. All hosting, upgrades and updates are included in the price.

We do offer private dedicated hosting for circumstances where additional security is required. We are happy to provide more detailed costing on this functionality on request.
