Students receiving need-based financial aid in eligible programs	21%
Students who work	40%
Students with children	22%

Gender:

Female	54%
Male	46%

* May not add up to 100% because students may be counted in more than one race.

POINTS OF INTEREST

Training the Next Generation of Advanced Manufacturing Employees

Everett Community College (EvCC) plays a key role in meeting industry demand for skilled manufacturing employees through programs at the college's Advanced Manufacturing Training & Education Center (AMTEC). The center recently opened a \$2.5 million expansion, adding eight new classrooms and a lab for a new mechatronics technician program.

AMTEC is also home to five other programs: welding and fabrication, engineering technician, composites, pre-employment, and precision machining. For more information about AMTEC programs, see EverettCC.edu/AMTEC.

National Leader in Transfer Practices

Columbia University's Community College Research Center and the Aspen Institute recognized EvCC as one of six leading colleges nationwide for helping students successfully transfer to four-year schools. The report also recognizes the University of Washington and Western Washington University as EvCC partners in transfer success.

EvCC is building on that success by working with faculty to implement Guided Pathways, an evidence-based approach that simplifies choices about college courses, informs and supports those choices, and directs students into a program of study that leads to a credential. EvCC received a \$500,000 grant from College Spark in July 2016 to help with Guided Pathways work.

Celebrating 75 Years of Higher Education

Founded in 1941, EvCC is celebrating its 75th academic year in 2016-17. In the past 75 years, EvCC has educated thousands of students, including community leaders, business owners, artists, nurses, engineers, and members of the Washington state Legislature. According to an economic impact study, more than 80 percent of alumni stay in the area to live and work after college.
