* May not add up to 100% because students may be counted in more than one race. Percentages calculated on reported value.

POINTS OF INTEREST

Bachelor of Applied Science in Agriculture Systems Walla Walla Community College launched its first Bachelor of Applied Science in Sustainable Agriculture Systems in the fall of 2018. In order to meet the predicted future demands that will be placed on the global agriculture and food system, this program takes an interdisciplinary agroecology approach addressing elements of 1) diversity, 2) synergy, 3) efficiency, 4) resilience, 5) recycling, 6) co-creation and sharing, 7) human and social values, 8) cultural and food traditions, 9) responsible governance and 10) economy.

Warrior Resources Food Pantry The Warrior Resources Pantry helps students meet their basic needs so they can succeed in college. We do this by providing students with emergency and short-term food supplies from our campus food pantry, connecting students to campus and community resources, and educating students on how to best manage available resources. Since September 2017, the pantry has distributed 7,531 pounds of food to 331 students.

25 Years of John Deere® Launched in 1994, Walla Walla Community College's John Deere® Technology Program continues to grow and evolve with the industry. John Deere partners closely with the program to provide newer machinery and components for students to work on so the curriculum remains current. The program's unique structure requires students to be sponsored by dealerships. The students alternate quarters between studying on-campus and interning with the dealership. Students transition directly into full-time jobs upon graduation.
