**STUDENT PROFILE — STATE-FUNDED**

**Race/Ethnicity**
- Am. Indian/Alaska Native 2%
- Asian 21%
- Black/African American 12%
- Hispanic/Latino 17%
- Pacific Islander 2%
- White 55%

**Gender**
- Female 60%
- Male 40%

**Family and Finances**
- Students receiving need-based financial aid in eligible programs 38%
- Students who work 43%
- Students with children 29%

**Median Age:** 28

**Type of Student**
- 36% academic/transfer
- 57% workforce education
- 5% basic skills
- 2% other

**Points of Interest**

- **We are Now Edmonds College**
  As Edmonds College, we remain committed to serving our community as an open-access institution, and that will stay central to our mission. We’re also continuing to innovate by pushing the boundaries of what a college can do to meet student and workforce needs. Our new name reflects our comprehensive offerings — from pre-college to an increasing number of four-year Bachelor of Applied Science degrees. We launched the new Information Technology–Application Development BAS in fall 2020 and will launch the Advanced Manufacturing and Materials Science Engineering Technology BAS in fall 2021.

- **New STEM and Nursing Building, and Triton Court Residence Hall**
  We’re proud to announce the grand opening of two new buildings on campus — Hazel Miller Hall, our STEM and Nursing building, and Triton Court residence hall. The opening of these buildings is an exciting achievement toward our goal of increasing student access and success. Hazel Miller Hall is a state-of-the-art, 70,000-square-foot building that houses allied health, nursing, physics, chemistry, engineering and math classrooms, as well as labs and offices. Triton Court is our second and newest residence hall and offers students a clean, safe and friendly living environment across the street from campus.

- **Train for a Career in Manufacturing or Aerospace in 12 Weeks**
  The Washington Aerospace Training and Research (WATR) Center is a manufacturing and aerospace training center managed by Edmonds College through an agreement with the Aerospace Futures Alliance. WATR Center offers students the technical and employability skills needed to find entry level positions in aerospace manufacturing. The center also offers customized training and has trained more than 2,000 incumbent workers. Short-term training has long-term benefits, from tackling the skills gap to driving the industry’s future innovations. To learn more, visit www.washingtonaerospace.com.
