

2017/2018 ARC Year End Report

The 2017/2018 year was another successful year for the Admissions and Registration Council. The Council continued to focus on student success, equity, diversity and inclusion (EDI), process improvement and ctclink. Council members actively participated on statewide work groups and committees, providing feedback and collaboration from the Council perspective. Professional development continued to build on last year's focus on EDI with both individual and work related growth opportunities. Members were very active with participation with ctclink Common Process Workshops and Global Design Review sessions in order to collaborate and align system-wide practices in preparation for upgrades and deployment of additional colleges. All in all, it was a very busy year!

Professional development activities:

- Growth Mindset – Greg Brazell, Pierce College (fall)
