Resources to Initiate Successful Employment (RISE)
Coding Instructions
Effective for Academic Years 2015-16 Forward

The Resources to Initiate Successful Employment (RISE) program is a 3-year Basic Food Employment and Training (BFET) enhancement pilot. It will be in effect from December 2015 through September 2018. The RISE program enrollments are reported using an Unusual Action code for both RISE test group and non-RISE control group participants.

Instructions

RISE Treatment Group
The RISE treatment group Unusual Action code must be added to the Unusual Action Code table in SMS (SM5021). Use unusual-action value “R+” for all students that are approved for RISE participation through the Mathematica randomization process.

RISE Control Group
The RISE control group Unusual Action code must be added to the Unusual Action Code table in SMS (SM5021). Use unusual-action value “M+” for all students that are identified as part of the RISE control group by the Mathematica randomization process.

RISE Exempt Group
The RISE exempt group Unusual Action code must be added to the Unusual Action Code table in SMS (SM5021). Use unusual-action value “M−” for all students who will receive RISE services, but will not be included in Mathematica’s study.

Traditional BFET Participants
All traditional BFET students will maintain the B! unusual-action value.

Coding Instructions
Enter the value for the student on the Student Unusual Action screen (SM5003) including the YRQ of their enrollment in the program. The student must be coded each quarter. This requires updating the YRQ field.
If you have any questions on the use of this code, please contact SBCTC Data Services at dataservices@sbctc.edu.
