Human Capital Management (HCM) Prompt Tables

Required secure HCM Prompt Tables

If one of the following fields is used in a HC Query prompt, the following prompt tables must be used.

| Field | Prompt Table |
|------------------|-----------------|
| COMPANY | VHC_CMPNY_SCRTY |
| BUSINESS_UNIT_GL | VHC_BU_GL_SCRTY |
| BUSINESS_UNIT_HR | VHC_BU_HR_SCRTY |
| SETID | VHC_SETID_SCRTY |

Recommended Tables to Join to Secure HCM Queries

| Field | Table to Join |
|------------------|-----------------|
| COMPANY | VHC_CO_QRY_SEC |
| BUSINESS_UNIT | VHC_BU_QRY_SEC |
| BUSINESS_UNIT_HR | VHC_BHR_QRY_SEC |

NOTE: In HCM, this is only needed with Default Prompts or if there is not already embedded security SQL or no secure prompt for the field. This will cause performance issues if the query already has embedded security SQL. Joining to most tables will add embedded security SQL in HCM to Company.
