Bug Fix: COD Lookup Table Info Not Found Error with loading of 2026 COD Response Files

Previously, when running CODIN to import Pell and DL response files for Aid Year 2026, one or more instances of the message 'COD Lookup Table Info not found. Tag: CIP Record: SFA_COD_DISB (14412,1001)' appears in the SFA_COD_IN Application Engine output file. With this PRP, when running CODIN, the SFA_COD_IN message log no longer produces the confusing error message.

Error 153 Subscript Out of Range with Repackaging and LEU > 500

Applied COBOL changes to ensure that the subscript out of range error will no longer be encountered when performing online/batch repackaging students with Pell Lifetime Eligibility Use of greater than 500.

New Direct Lending Year Translate Values and Warning Messages

Delivered new translate values for Direct Lending Loan Year and Direct Lending Loan Calculated Year fields for Aid Year 2027 and forward. Also, delivered code logic to display a warning message when a user selects an invalid translate value on FA Term for the aid year

There are six new Direct Lending Loan Year translate values for Aid Year 2027 and on

- 11 Grad Never Prof
- 12 Grad Was Prof
- 13 Prof Never Grad
- 14 Prof Was Grad
- 15 Grad Concurrent Enrollment
- 16 Prof Concurrent Enrollment

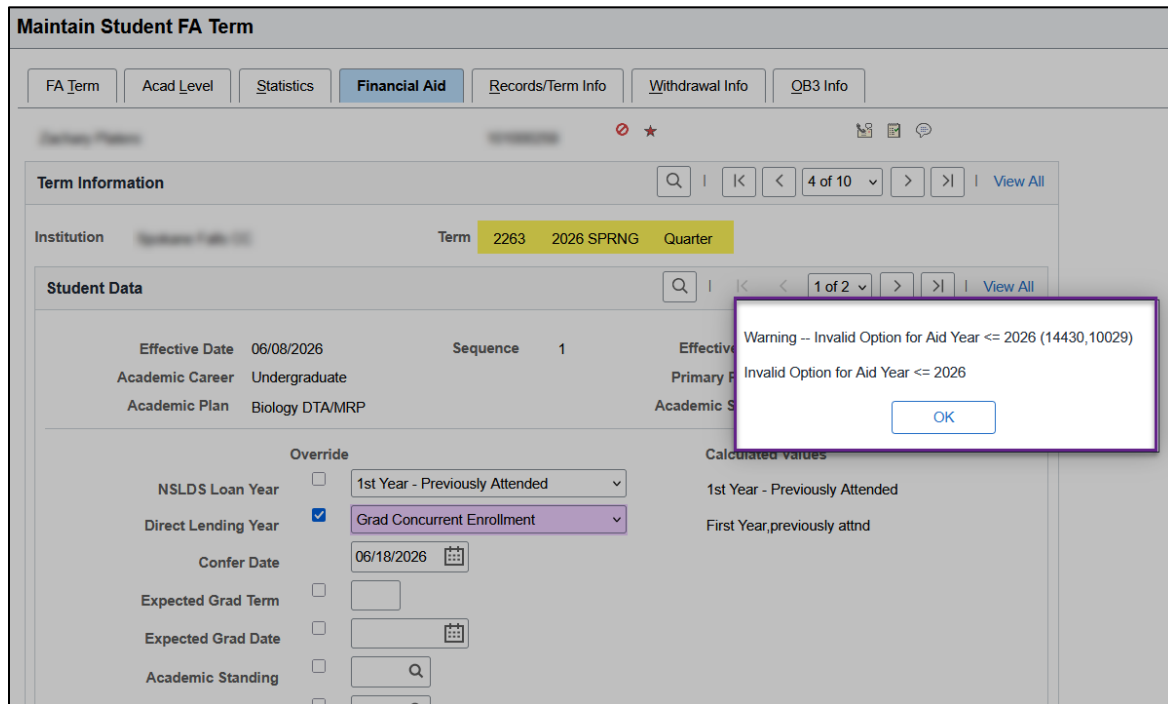

Note: These six new values are also available on the *Level/Load Rules Table* page but CTCs do not offer Graduate programs so they will not be selected in setup.

'OB3 Info' FA Term tab and Updates to STDNT_FA_TERM record

Created new fields and modified FA Term record, pages, COBOL and SQR objects to address the Technical Reference specifications for Aid Year 2026-2027.

Note: Expect to see your Odd Year ISIR Jobset running longer than usual when this PRP goes in as the Batch FA Term Process will be selecting all Aid Year 2027 students to calculate values into the 'OB3 Info' tab.

This PRP delivered loan proration support values that institutions may use in packaging equations, population selection, queries, manual review, or other institutional business processes. Oracle is not delivering any coding updates or processes that use these loan proration support values.

Units Loan Limit Percent FA

Stores the units used for the term for loan limit percentage processing.

Term Loan Limit Percent

Stores the term-level loan limit percentage.

Annual LLP (Loan Limit Percent)

Stores the annual loan limit percentage for the student's career in the aid year.

This PRP also delivered OB3 packaging indicators that delivered packaging uses to select the appropriate aggregate limits.

OB3 Use Professional Lifetime

Identifies whether a current graduate student should use the professional lifetime limit because the student previously borrowed as a professional student. This field defaults to 'N'.

OB3 Legacy Eligible Flag

Identifies whether the student should be packaged using legacy limits. This field defaults to 'N'.

OB3 Classification for ProfFlg

Identifies whether the student's program is classified as professional for OB3 processing. This field pulls from the field added to the Academic Plan table setup page under student records. The default for this field on the ACAD_PLAN_TBL is 'N'.

New FA Term OB3 Fields Available for Population Update

Delivered a script to allow the following five OB3 fields in the STDNT_FA_TERM record to be updatable by the *Population Update Process*.

SFA_ANNUAL_LLP
SFA_OB3_LEGACY
SFA_OB3_USE_PROF
SFA_TERM_LLP
SFA_UNT_LLP_FA

There already is a reported bug indicating updates to SFA_OB3_LEGACY and SFA_OB3_USE_PROF fields do not retain when an FA Term is rebuilt:

39474921 - OB3 FLAGS ON OB3 INFO TAB REBUILD AS 'NO' EACH TIME WITHOUT AVAILABLE OVERRIDES

Should colleges need a process to update the values back onto a rebuilt row until a patch is delivered by Oracle, FA Support will create a pop-update process. Oracle has not determined a fix yet.

The SFA_OB3_LEGACY field is the only field out of the five that will be available for the Populate Update Process. SFA_OB3_USE_PROF will not be used at CTCs and the loan proration support fields are being considered for solutioning [Mass Pack #3](#).

Known Issues

The following are details on bugs with the delivered functionality that have not yet been resolved by Oracle.

Error Occurs when Selecting the Expand All or Collapse Links for the NSLDS Data 1 Link on the 2025-2026 ISIR File Data Page

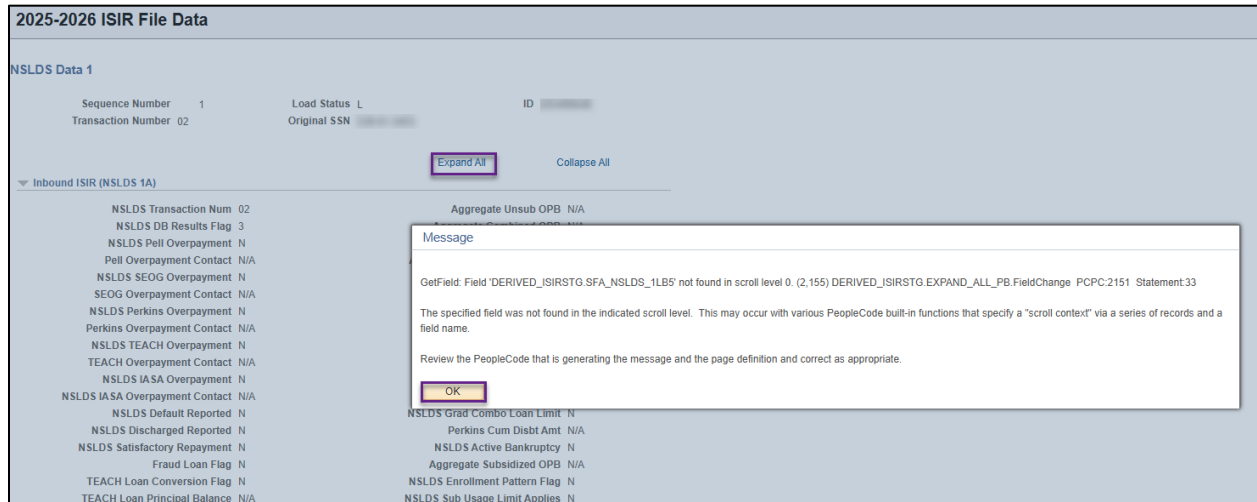

After applying PRP Patch 38749448 - OBBB: DATA MODEL UPDATES and loading new ISIR files for the 2025-2026 aid year, the following error occurs when selecting the 'Expand All' or 'Collapse All' links on the NSLDS Data 1 link on the 2025-2026 ISIR File Data page.

```
'GetField: Field 'DERIVED_ISIRSTG.SFA_NSLDS_1LB5' not found in scroll level 0. (2,155)

```

Users can move past the error message by selecting 'OK' and the page displays without issue. The same behavior occurs when clicking the 'Collapse All' link

Financial Aid Term: OB3 Flags on OB3 Info tab were Delivered Without Overrides

Oracle delivered the new OB3 Info tab for FA Term including two checkbox fields for OB3 Legacy Eligible Flag and OB3 Use Professional Lifetime. Because these fields were delivered without corresponding overrides, if either box is updated manually or using the Population Update Process, the value won't maintain and will get set back to the default value of 'N' with the box checked off, the next time the term rebuilds.

It's expected there should be an override flag to maintain the value, like with all other similar fields; OR when FA Term rebuilds, it should carry over the value (whether 'Y' or 'N') from the previous row, rather than rebuilding with the 'N' default value each time.

Bug 39336337 - OBBB: Data Model Update to NSLDS TEACH/ACG/NSG/IASG records

Fix is in a POC released on June 9th.

NSLDS: NSLDS Data Incorrect in PS

Oracle currently has reported multiple scenarios where NSLDS information is displayed inaccurately in PS.

Bug 39465112 - NSLDS PUSH: NSLDS CROSS-REFERENCE TO AGGREGATE AREA HAS NOT BEEN DEFINED

When running the Update NSLDS with Aggregates (NSLDS Data 'Push') application engine process SFA_NSLDSUPD, it is not updating any aggregates. The aggregate rows get created, but the NSLDS amounts are not updated and left at 0. The message 'NSLDS Cross-Reference to Aggregate Area Has Not Been Defined' appears multiple times in SFA_NSLDSUPD output file.

Fix is targeted for a PRP currently expected to post in mid July 2026 and then will also be included in Campus Solutions PUM Image 9.2.39

Bug 39416224 - AFTER OB3 UPDATE, LOADING 'OLD' ISIR LAYOUT NOT UPDATING NSLDS FIELDS THAT HAVE A LENGTH OF 6 AS EXPECTED

After applying OB3-related updates, loading ISIR files that use the old ISIR layout causes NSLDS aggregate amounts to be loaded incorrectly. Values that should be stored as whole-dollar amounts are instead written with an implied decimal, resulting in amounts being reduced by a factor of 100. For example, an incoming aggregate of \$3500 is loaded as \$35.00.

This issue occurs when processing old-format ISIR files, including prior-year ISIRs and the old 2027 ISIR layout. The problem is visible in the NSLDS data stored in the NSLDS_FAT_AGGR table.

Fix is in a POC released on June 9th.

Bug 39372779 - INCORRECT FIELD VALUES DISPLAYED AS ZERO AFTER LOADING NSLDS FILE IN OLD FORMAT

Details of the issues are not clear.

Fix is in a POC released on June 9th.

Direct Loan Outbound (DLOUT) SFA COD OUT Step Creates Origination File Without Required Tag for Enrollment Intensity for Aid Year 2027

After applying PRP Patch 38749448 - OBBB: DATA MODEL UPDATES, when running Direct Loan Outbound (DLOUT), the second step SFA_COD_OUT creates the outbound origination files without the enrollment intensity tag, which causes COD to reject the files.

For Aid Year 2027, enrollment intensity is required to be reported when first establishing the student's loan with COD, therefore it is expected the tag be written to the origination files and not just disbursement files as has traditionally been the case prior to Aid Year 2027.

Bug 39431231 - LOAN RESPONSE FILE IS REJECTING BECAUSE IT'S MISSING THE ENROLLMENT INTENSITY ON THE FILE.

Fix is targeted for a PRP expected to post mid July 2026.

Note: A fix was released in a Proof of Concept (POC) June 9th. During testing, FA Support discovered that the fix impacted ISIR processing. We are working with technical to resolve the issue so that colleges can process 2027 Direct Loan (DLOUT) files.
