Introduction

This FA PRP (Peoplesoft Release Patchset) Overview Document is intended to provide ctcLink users with a summary of the changes that will be made in the system as a result of the upcoming 2026-2027 FA PRP 3.1 upgrade implementation. Each FA PRP contains bug fixes and features that are important for PeopleSoft to work well. Below is an overview of the changes that you can expect to see as part of this upgrade.

Financial Aid

FISAP Processing

This Financial Aid regulatory update enables reporting of 2025-2026 aid year data to apply for campus-based funds for the 2027-2028 aid year.

A new page for this is available within the *Fund Management* navigation for generating this report but note the header is incorrect. Colleges will use FISAP28 to report eligible applicants for the 2025-2026 aid year.

Navigation

Financial Aid > Fund Management > Generate FISAP Reports > FISAP Report 2027-2028

Image: FISAP Report 28 Run Control with incorrect header

The screenshot displays the 'Report on Eligible Aid Applicants for Award Year 2026 - 2027' header, which is highlighted in red. Below the header, the form includes a 'Run Control ID' field, a 'Report Manager' link, a 'Process Monitor' link, and a 'Run' button. The 'Institution' field is set to 'Clemson University' and the 'Aid Year' is set to '2025-2026 Financial Aid Year'. Under the 'Overrides' section, both 'SSA Citizenship Override' and 'DHS/INS Match Override' are checked. The 'Print Student List' section has 'Print Student List' checked and 'Output Type' set to 'CSV File'. The 'File Path' field is empty.

The FISAP report includes the following updates:

- Update to Report ID
- Updates to Aid Year and Award Year dates

Note: The Enrollment Status Effective date Oracle is pulling for students is the start date of the term for when the student was first admitted for the Academic Program. Their SQL does not account for breaks in enrollment so there may be instances where a college may need to update directly in COD if the Enrollment Status Effective Date from PS is incorrect.

Although Oracle delivered the Override Enroll Status Eff Dt field, we do not recommend using this checkbox at this time as several HEUG users have reported receiving disbursement rejections when using that checkbox.

Bug Fix: Incorrect Field Values Displayed as Zero After Loading NSLDS File In Old Format

Details on this bug are unclear. From our testing, we found that when loading an old-format NSLDS file (pre-April 26), the data is incorrectly stored as zero on the NSLDS page and in the NSLDS_FAT_AGGR table.

With this bug fix, the values provided in the NSLDS file are correctly reflected on the NSLDS page and the NSLDS_FAT_AGGR table.

Bug Fix: NSLDS Push Error: ORA-01400: Cannot Insert Null Error with Processing Teach

Previously, when running the Update NSLDS with Aggregates (NSLDS Data 'Push') application engine process SFA_NSLDSUPD, it finishes in 'No Success' with the following error message indicated in the .stdout file. The message will vary slightly in each case, but below is an example of the error:

Return: 1400 - ORA-01400: cannot insert NULL into
("EMDBO"."PS STDNT AGGR LIFE"."SFA OB3 PROF TOT")

```
Failed SQL stmt: INSERT INTO PS_STDNT_AGGR_LIFE (EMPLID , AGGREGATE_AREA , AID_YEAR ,
UNDRGRAD_TOTAL , GRADUATE_TOTAL , TOTAL_TERMS , CURRENCY_CD , SFA_NSLDS_AGGR_AMT ,
OVERRIDE , LASTUPDOPRID , SFA_NSLDS_UPDDTTM , SFA_NSLDS_PUSH_DT , SFA_PKG_DEP_STAT
, PAR_CREDIT_WORTHY , DL_HEAL_LN_SW , SFA_NSLDS_GRAD_AMT , SFA_GRAD_OVERRIDE ,
SFA_PRCNT_USED_RPT , SFA_PRCNT_USED_TOT , SFA_PRCNT_OVERRIDE , SFA_LEU_NSLDS ,
SFA_LEU_NSLDS_OVRD ) VALUES ('FAPK0131' , 'TEACH' , '2027' , 0 , 0 , 0 , 'USD' , 0 , 'N' , '' , NULL ,
NULL , '' , '' , '' , 0 , 'N' , 0 , 0 , 'N' , 0 , 'N' )
```

The issue does not occur in every case but happens specifically when the code for TEACH is triggered based on the available data and configuration for the TEACH aggregate set up on the Aggregate Translation and Aggregates for Institution tables. To mitigate this, FA Support asked colleges to set their TEACHxxx to Inactive on the Aggregate Aid Limits table in setup.

With the implementation of this PRP, colleges will be able to reactivate their TEACHxxx in the Aggregate Aid Limits table (Set Up SACR > Product Related > Financial Aid > Awards > Aggregate Aid Limits) for both aid years. To update setup, add a new effective dated row using today's date and set TEACHxxx to Active.

Bug Fix: After OB3 Update, Loading 'Old' ISIR Layout Not Updating NSLDS Fields That Have a Length of 6 as Expected

Previously, after applying OB3-related updates, loading ISIR files that use the old ISIR layout causes NSLDS aggregate amounts to be loaded incorrectly. Values that should be stored as whole-dollar amounts are instead written with an implied decimal, resulting in amounts being reduced by a factor of 100. For example, an incoming aggregate of \$3500 is loaded as \$35.00.

This issue occurs when processing old-format ISIR files, including prior-year ISIRs and the old 2027 ISIR layout. The problem is visible in the NSLDS data stored in the NSLDS_FAT_AGGR table.

With the fix delivered in this PRP, the NSLDS fields that have a length of 6 will display the correct amounts from the file on the NSLDS page and in the NSLDS_FAT_AGGR table.

Bug Fix: FA_INBOUND Missing Logic to Check for ISIR Data in Row 2 of File

Modified logic of ISIR Import Process (FA_INBOUND) to check for header row and correctly identify ISIR Version field (' ' = old layout or '1' = new layout) by looking at the next row. This fix in coding will allow users to load their ISIRs into *Upload/Download Files* without modifications to the ISIR file (i.e. removing the header row)

NOTE: When an ISIR file is incorrectly identified as old layout but processed as the new layout, the student's NSLDS data is incorrectly placed in the NSLDS tables.

Known Issues

The following are details on bugs with the delivered functionality that have not yet been resolved by Oracle.

NSLDS Data Push

With the NSLDS bug fixes and FA_INBOUND bug fix applied to production through this PRP, data in NSLDS tables will be placed correctly *moving forward*.

Oracle delivered two App Engines to clean up the *existing* data in NSLDS tables and we ran them but none of the attempts resulted in positive changes to the data.

The NSLDS Push query, CTC_FA_SB_PS_NSLDS_WEEKLY_PUSH, has been modified with criteria to skip pushing ISIR NSLDS data with a Process Date that is before 08/28/2026. This modification will prevent ISIR Jobsets from crashing at the NSLDS Push process.

NOTE the aggregate tables are shared by colleges so even if your college correctly loaded AY 2027 ISIRs after April 26th with the header removed, a different college could have loaded it incorrectly for the same student.

Colleges are encouraged to request Financial Aid History data from NSLDS to push the most recent and accurate data into the NSLDS tables and Aggregate Areas for students.
