Introduction

The Image/Upgrade Overview Document is intended to provide ctcLink users with a summary of the changes that will be made in the system as a result of the upcoming image or PeopleTools upgrade implementation. Oracle releases multiple PeopleSoft updates, called images, for each pillar every year. Each Image contains bug fixes and features that are important for PeopleSoft to work well. PeopleTools upgrades update the underlying framework of the system. There are minimal changes that are noticeable to the end users. Below is an overview of the changes that you can expect to see as part of this upgrade.

INAS Warning Messages Appear When Making ISIR Corrections with Discrepancies

After applying Image 19, INAS Warning Messages were not invoked when discrepancies were entered. Modified PeopleCode invoked by INAS button in the "Correct 20xx-20xx ISIR Records" and "Maintain Application 20xx-20xx" components so the INAS Warning Message will now appear when discrepancies are entered.

Pell COA Correctly Building to Full Annual Amount

After applying Image 20, Pell COA and Pell LTHT COA were not correctly building to full annual amount when one FA Term in the aid year had Load of N or was set to Inactive. Modified the SQL in the Budget Move COBOL store statement, adding a Financial Aid Load check to the Enrolled Term
SQL Where clause.
