Introduction

The Accessibility Supplemental Information Document is intended to provide ctLink users with a summary of the accessibility changes that will be made in the system as a result of the HCX upgrade implementation. HighPoint releases multiple HCX updates, for the CS pillar every year. Each update contains bug fixes and features that are important for HCX Mobile to work well and bring forward user experience and accessibility improvements forward.

Change Log From the HighPoint Support/News Wiki

<https://support.mhighpoint.com/news>

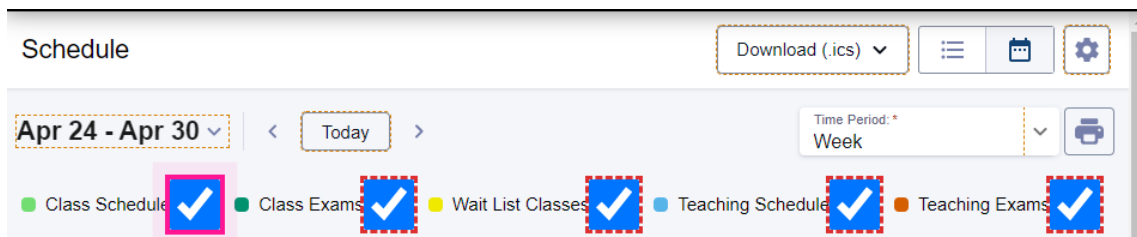

- [Advisors] Accessibility enhancements for Advisor Information

- [General] Accessibility issues were addressed to improve focus management and error announcements.
- [General] Accessibility issues were addressed within Class Search and in Dashboard navigation to include improved focus indicators and tab order.
- [Evaluate My Transfer Credit] Improvements were made to address user accessibility issues.

High Priority Bugs Submitted by CATO & SBCTC that have been Released

[Schedule] Added accessibility labels to schedule filter options (SBCTC)

The 5 new filter checkbox elements on the Schedule planner, ie 'Class Exams', have no accessible name, associated <Label>, or [title].

[Springboard] Accessibility improvements to the Springboard tiles (SBCTC/CATO)

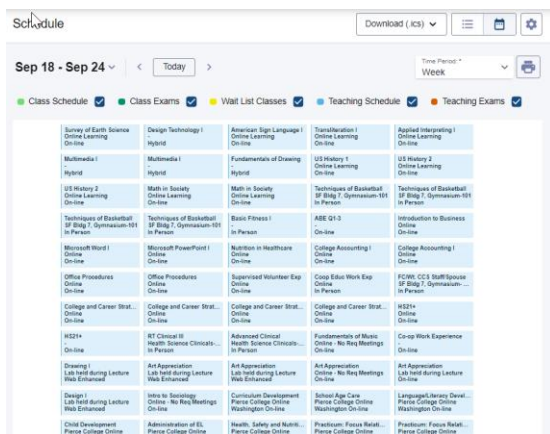

1. H2 Heading labels have been removed from springboard tiles
2. Updated semantic elements and roles that are used for springboard links

 ctcLink Login	 Canvas	 Class Search	 Course Catalog	 Campus Map
 Service Hours	 Calendar	 Student Support	 Financial Aid Portal	 Find My Books
 cTran	 Contact Security	 Twitter	Tweets from @ctcLinkClark 	

1. Schedule Calendar has ben refactored for keyboard accessibility

- a. The user is able to tab through the list of calendar items and view the details for each event individually. This exception indicates that while the visual representation of the calendar is a table, accessible navigation is implemented using a different method.

High Priority Bugs Submitted by CATO & SBCTC that are in Development

Issue Reported : Button State change not announced to user

On several pages where a selection is needed to be made, (i.e. Dashboard > Edit My Widgets), the submit button is deactivated until a checkbox control, changes state (checked/unchecked). Once a selection is made, the submit button then becomes active ('Save Changes' for Widgets page)

Select widgets to display on dashboard
