

BA1006 – Budget Development Configuration Table

This is a required table with user-defined codes.

The Budget Development Configuration Table assigns columnar headings and field titles to the 10 budget development columns. These headings and titles are displayed in the budget development screens and reports. This table also identifies whether the column can be modified and whether detail budgetary data (monthly distribution amounts, salary and wage, comments) can be attached to a column.

Screen BA1006 updates the Budget Development Configuration Table.

User Function Keys

F1	REFRESH	Redisplays the screen and record. Any changes or additions you made since you last pressed Enter will disappear.
F3	CHANGE	Changes an existing column configuration.

Update Instructions

To update the table, follow the steps below:

1. Press F3 (Change).
2. In the highlighted fields, type the data.
3. Press Enter.
