

## ZX0020 – Zip Code Table

Required table. Codes defined by colleges.

Use the Zip Code Table to identify city, county, and state information for each zip code. The Zip Code Table is used throughout FMS, SMS, and PPMS to assign the city and state to addresses. City and state fields on the screens are always "display only."

For a complete list of zip codes, run the DataExpress procedure ZX0020R (from Group Inform, Account PLIB).
