

ZX0080 – File Selection Screen

Optional table. Codes defined by SBCTC-ITD.

Use the File Selection Screen to view the extract files (budget status, account summary and account detail) available for online access (for example, through Data Express). The extract files currently being used for online access are identified with an asterisk (*).

The File Selection Screen allows you to select which extract file to use for online access. For example, two budget status extract files exist on the File Selection Screen, one for the current fiscal year and one for the next or previous fiscal year. By accessing the file Selection Screen and choosing the appropriate budget status extract file, you can inquire on data for multiple fiscal periods during the same day.

The number of extract files displayed on the File Selection Screen is determined by the values (for example, data set name BA1290S, quantity 2, unit EA) entered on the Storage Management Screen (ZX0050).

Data Fields

SEL IND	FMO (display only)
FILE ID (display only)	FYR (display only)
RUN DATE (display only)	MO13 IND (display only)
YR-MO (display only)	EXTRACT FILENAME (display only)

Selection Indicator

Definition	A field used to select which extract file to use for online access.
Length	1 character

File Identification

Definition	Display only. The file identification as it is defined in the system dictionary.
-------------------	----------------------------------------------------------------------------------

Run Date

Description	Display only. The creation date of the extract file.
--------------------	------------------------------------------------------

Year Month

Definition	Display only. The contents of the extract file.
-------------------	-------------------------------------------------

Fiscal Month

Definition	Display only. The fiscal month number of the extract file.
-------------------	------------------------------------------------------------

Fiscal Year

Definition	Display only. The fiscal year of the extract file.
-------------------	----------------------------------------------------

Month 13 Indicator

Definition	Display only. A code which indicates whether the extract file includes or excludes data when processing for the 13th or 25th month.						
Values	Defined by SBCTC-ITD as follows: <table><tr><td>0</td><td>Normal month-end processing</td></tr><tr><td>1</td><td>13th/25th month - exclude 12th month</td></tr><tr><td>2</td><td>13th/25th month - include 12th month</td></tr></table>	0	Normal month-end processing	1	13th/25th month - exclude 12th month	2	13th/25th month - include 12th month
0	Normal month-end processing						
1	13th/25th month - exclude 12th month						
2	13th/25th month - include 12th month						

Extract Filename

Definition	Display only. The filename of the data file, showing the group where the data file is located.
-------------------	------------------------------------------------------------------------------------------------
