

COA Table Build Process for 2020-21 Fiscal Year

Scheduling FG046R (Purge and Rebuild COA Tables for New Fiscal Year).

This job group creates a new set of Chart of Accounts tables from the current year's tables.

Important:

- **FG046R Table Build Process must be completed before you begin the budget initialization process.**

Note: FG046R can be scheduled as often as necessary to rebuild the Chart of Accounts tables; however, keep in mind the following:

- If you have already built the FYR 20-21 Chart of Accounts tables and rerun FG046R, all updates to the FYR 20-21 Chart of Accounts tables will be replaced or lost unless you also make the updates to the FYR 19-20 Chart of Accounts tables.
- If you make updates that pertain to both FYR 19-20 and FYR 20-21 - and you *will* rerun FG046R - you may make the additions, revisions, deletions, and other changes only to the FYR 19-20 Chart of Accounts tables. When rerunning FG046R, entries made to FYR 19-20 will be added automatically to FYR 20-21.
- If you make updates that pertain to both FYR 19-20 and FYR 20-21 - and you will *not* rerun FG046R - you must make the additions, revisions, deletions, and other changes to both the FYR 19-20 and FYR 20-21 Chart of Accounts tables.

Use the information in the table below to schedule job group FG046R.

Job Group	FG046R
