Introduction

Web Credit Card is a web-based application that gives your students the ability to make payments by credit card. This document describes how to install Web Credit Card, release 3.2.1. This release contains an enhancement to version 3.2.

Getting Started

This section covers things you will need to do before you undertake the installation process.

Gather Information for Use with the Setup Program

In the first part of the installation process, you download and run the Setup program, which will prompt you for information unique to your college. Be prepared to respond to the prompts that are displayed for your college; prompts may include some or all of the following:

Setup Prompt	Description
College Code	Your three-digit college code
Server Installation Type	The type of web server on which you are installing Web Credit Card. The options are: <ul style="list-style-type: none">• HP-Unix web server located on your campus• Linux web server located on your campus• Linux web server located at SBCTC-ITD (aurora.ctc.edu)• NT web server located on your campus
Domain Name Server (DNS)	The domain name of your web server, for example: www.yourcollege.ctc.edu
Web Credit Card URL	The URL to the directory on your web server where the web files (HTML files) for Web Credit Card are installed, for example: www.yourcollege.ctc.edu/wts/wccba
Ccserver URL Path	The URL to the directory on your web server where the Web Credit Card CGI program resides. This program is named ccnnn.exe (where “ <i>nnn</i> ” is your college code). <ul style="list-style-type: none">• For most NT systems: www.yourcollege.ctc.edu/scripts/ – OR –• For most Unix or Linux systems: www.yourcollege.ctc.edu/cgi-bin/

Files Included with this Release

The following file is included with this release. During the Setup program, it is unpacked on your PC. After the Setup program has completed, you will copy the file to the Web Credit Card directory on your college's web server.

File Name	Description
waci601.html	Pass through Transaction Amount and collect Credit Card information

Updating to Web Credit Card 3.2.1

This section provides instructions for colleges who already have Web Credit Card 3.2 installed and are updating to Web Credit Card 3.2.1.

To install Web Credit Card 3.2.1, you must complete the following steps:

1. Download and run the Setup program (**WebCreditCard-3-2-1.exe**).
2. Install the new Web Credit Card HTML file onto the web server.

The following section describes these steps in detail.

Install File on the Web Server

This section walks you through the process of installing the new Web Credit Card file on your college's web server. In Steps 1 and 2, you download and run the Setup program, which unpacks the Web Credit Card file onto your PC. In Steps 2 and 3, you copy the new HTML file from your PC onto your college's web server.

To install the Web Credit Card file, use the following steps:

1. From your PC:
Save the **Web Credit Card 3.2.1** Setup program to your PC.
2. On your PC:
Double click the file **WebCreditCard-3-2-1.exe**
The Setup program is launched and prompts you for various custom information that you must provide (see [Gather Information for Use with the Setup Program](#)). When you have finished responding to the prompts, the Setup program automatically unpacks the Web Credit Card file onto your PC. The Setup program **may take several minutes** to complete.
3. On your PC:
Locate the Web Credit Card installation directory where the Setup program saved the file to be installed, **waci601.html**.
The default installation directory is **C:/Program Files/CIS/Web Credit Card**
4. From the installation directory on your PC:
Copy the file **waci601.html** from the Web Credit Card installation directory on your PC to the Web Credit Card directory on your web server. This is the directory on your web server where the Web Credit Card HTML files reside. You can use any software that allows you to copy files (for example, Windows Explorer or FTP).

Copy the file as ASCII. Verify that the permissions on the file are correct. At a minimum, they should allow Read and Execute access for all viewers of the Web Credit Card page.

Troubleshooting the Web Credit Card Payment Process

Please see [Troubleshooting the Web Credit Card Payment Process](#) document found in the [FMS Documentation Index](#) for further information.

Contacting SBCTC-ITD for Assistance
