

CR6004 – Reporting Extract Purge Screen

Use the Reporting Extract Purge Screen to purge salary forecasting extract files which are no longer needed. This screen allows you to delete part or all of the extract files from the database.

User Functions and Key Fields

FUNC	I (Inquire), P (Purge), D (Delete)
SCREEN	CR6004
KEY1	Leave blank
KEY2	Leave blank
KEY3	Leave blank

Purging Salary Forecasting Extract Files

This screen displays all of the salary forecasting extract files created through the job scheduling process. The extract files are six-character codes defined by colleges and assigned to "input" and "output" files.

To display all of the extract files, enter **I** (Inquire) in FUNC.

To purge selected extract files from the database, enter **P** (Purge) in FUNC. A **P** is entered in the PURGE IND field next to all of the files to be purged.

To delete all extract files from the database, enter **D** (Delete) in FUNC.
