Program Description

Big Bend Community College (BBCC) is proposing to offer a Bachelor of Applied Science (BAS) Degree in Applied Management. BBCC is a regionally and nationally accredited college with an accomplished and committed faculty and staff who serve nearly 4,000 students annually. BBCC offers transfer degrees, professional-technical training programs, basic education for adults, as well as customized job skills and community education classes.

The proposed BAS in applied management will build upon all of BBCC’s current Associate of Applied Science (AAS) degrees, especially its degrees in Business, Aviation, Computer Science, and Trade/Industry occupations. Significantly, the program will provide customized upper-level courses geared toward the needs of students from a variety of professional-technical programs as well as regional employers. The program will be designed to address management skills sought by employers in the primary sectors of the local economy. Employers have expressed concerns about the difficulty of finding and keeping qualified applicants, especially ones who already live in the community. A bachelor’s degree offered by BBCC would help produce a more highly skilled local workforce. Ninety-three percent (93%) of employers indicated via a survey that it was very or somewhat likely that a bachelor’s degree program offered at BBCC would help them find qualified applicants for supervisory and managerial positions.

The BAS Degree in Applied Management will meet higher education needs of place-bound and under-represented individuals within the BBCC service district. The Chronicle of Higher Education identified the region served by BBCC as an “educational desert” because of low levels of educational attainment and limited or no access to bachelor’s degree education (Myers, 2018)1. There are no Baccalaureate granting institutions within 60 miles of BBCC or within its service district. Hispanic and other historically under-represented students are over represented among first-generation students at BBCC and do not transfer at the same rate as Asian and white students. According to the latest BBCC data, only 26% of first-time, full-time students from historically under-represented groups (HUGs) transferred within 150% of normal time to completion. In contrast, 44% of BBCC Asian and White students transferred within the same time period.

BBCC will use administer and deliver the program in ways that benefit working adults. Most courses will be hybrid with face-to-face class times in the evening. The courses will utilize a flipped model of instruction. The program will also explore opportunities for offering the degree at off-site locations, granting credit for prior learning, and giving students the ability to accelerate through courses upon demonstrating mastery of learning outcomes.

Draft outcomes

Based on input from regional employers, BBCC has developed the following draft program outcomes for the BAS degree in applied management:

---

- **Communication.** Communicate effectively with internal and external stakeholders using an appropriate channel for the situation.
- **Equity & Diversity.** Apply and analyze multicultural strategies to facilitate respectful and equitable inclusion of diverse individuals and perspectives to achieve organizational goals.
- **Operations Management.** Identify the significance of and key decisions in the operations management function, and quality management/quality control methods.
- **Project Management.** Develop comprehensive project plans, monitor the plans, identify areas of risk and deal with problems through appropriate use of project management techniques.
- **Leading.** Demonstrate effective leadership, critical thinking, teamwork, and technical and information literacy competencies needed to make business-critical decisions to resolve interpersonal and organizational challenges that most often occur in the modern workplace.
- **Ethics.** Demonstrate integrity through ethical behavior and socially responsible decision making.
- **Human Resources.** Apply organizational behavior principles and human resources management practices to effectively develop, hire, and retain a skilled workforce.
