Fix 2015-17 funding shortfalls

- Critical compensation adjustment: $10.9 million*
  The 2015-17 operating budget provided compensation increases for college staff, but the budget funded only 83 percent of the impact to college budgets. Full compensation funding would protect funds already budgeted for student programs and services.

- Adjust for tuition reduction in applied baccalaureate programs: $1.98 million*
  The 2015-17 operating budget accounts for lost tuition revenue for lower-division coursework, but the offset does not fully cover lost revenue in applied bachelor’s degree programs. An adequate backfill would support these successful, in-demand workforce degrees.

- Support instructional facilities: $82.6 million supplemental capital budget request
  The 2015-17 capital budget lacks funding for eight priority capital projects at the following colleges: Edmonds, Wenatchee, Olympic, Pierce Fort Steilacoom, Whatcom, South Seattle, Bates and Shoreline. This would advance our ten-year capital plan and protect students from learning in dilapidated or inadequate buildings.

Fill skill gaps in the workforce

- Basic Education for Adults: legislative policy request (HB 2329 & SB 6161)
  About 650,000 to 700,000 Washington adults need basic skills to pursue college for living-wage jobs and meet employers’ needs. SBCTC requests this population be added to the caseload forecast to develop stable funding for adult basic education in the future.

- STEM degrees: $4.3 million*
  The MESA Community College Program helps under-represented students pursue STEM degrees. This additional investment would expand the program from six colleges to all 34 colleges.

- Opportunity Grants: $5.6 million*
  SBCTC requests funding to expand the Opportunity Grant Program. The program provides student support services and financial help for low-income student to pursue education in high-wage, high-demand careers.

Promote student success

- Faculty increments: $10.2 million*
  Students and employers alike rely on faculty to bring knowledge and innovation into the classroom. Funding faculty increments would help colleges retain and attract the talent needed to maintain excellent instruction.

- Advising, career planning and development: $9 million*
  Academic advising, career planning and other support services keep students on-track to graduate on time. New investments would support these vital services, which were cut deeply during the Recession-era budget reductions.

- Public safety through corrections education and training: legislative policy request (HB 2619 & SB 6260)
  National research shows that prison education reduces recidivism rates and frees public funds for other important priorities. A statutory change is needed to allow the use of existing state funds for academic degree programs within corrections institutions.

- College affordability
  SBCTC supports the Washington Student Achievement Council in seeking additional funding for the State Need Grant and College Bound Scholarship program.

* Part of $43.8 million supplemental operating budget request.
