Introduction

Voluntary skill standards that are industry-based and can be transformed into educational curriculum will better educate the cosmetology professionals for the workplace of today and tomorrow. In order to compete in the rapidly changing cosmetology industry, cosmetologists must have the requisite knowledge and skills necessary to compete effectively and efficiently in the work environment. As more complex performance demands increase, cosmetologists will be expected to be accomplished and proficient in their work skills. This level of expertise and expected competence is the basis for the development of comprehensive skill standards for the cosmetology industry.

Based on a 1992 Cosmetology workforce projection, the industry revealed an inevitable shortfall between its growing business and a qualified workforce. In June 1992 at the Cosmetology Advancement Foundation Summit, industry leaders resolved to work together to address the industry concerns, particularly the shortfall of qualified cosmetologists. In the wake of an industry struggling to promote a positive image, retain experienced workers, promote mobility within the US, and narrow the gap between industry needs and education, the cosmetology industry sought to develop National Industry Skill Standards. National Industry Standards will provide a solid foundation for solving the many challenges facing the 21st Century Cosmetologists.

This is the first of many steps to bring about the desired changes within the cosmetology industry. Other specialty areas are gathering resources to build on this infrastructure and a more standardized industry will evolve with every additional phase. This project has been solely funded by the cosmetology industry and its leaders.

The goal of this project was to identify skill standards that reflect the standards expected in the cosmetology industry. The benefits and advantages of implementing these skill standards in education and the salon system are:

- Improved education of the cosmetology students
- Provide seamless integration from school to work
- Establish educational mobility through development of competency learning standards based upon a national assessment instrument-skill standard
- Industry based standards will facilitate education reform to match curriculum to workplace requirements for knowledge, skills and abilities
- Serve as a vehicle to communicate expectations clearly and concisely
- Provide the industry with more accurate performance measurement and assessments for the cosmetology professionals
- Cosmetologists will have a tool with which to measure performance, additional educational needs or requirements for career advancement
- Provide comprehensive testing and evaluations tool for occupational and continued competence for the cosmetologist

A consortium of leaders from the cosmetology industry jointed in a cooperative effort in the research and development of these competency based skill standards. Representatives included cosmetologists, salon coordinators, business owners, cosmetology vocational program instructors, private school owners, apprenticeship coordinators and representatives from the community colleges. Leadership and grant administration was provided by RoseAnn Stevenson, Ph.D.

Key financial support for the grant was provided by School-to-Work funds.

## Ordering Information

41
Voluntary cosmetology skill standards that are industry based can inform educational curriculums to better prepare cosmetologists for the workplace today. In order to compete in today’s marketplace, Cosmetology must close the qualification gap between the knowledge and skills needed in today’s workplace and the current level of preparation of the workforce.

As the first step towards accomplishing this goal, the State Board for Technical and Community Colleges along with various cosmetology organizations identified skill standards for cosmetology careers. These standards are summarized in this document.

A consortium of cosmetology professionals joined in a cooperative effort in the research and development of these competency-based skill standards. Salon coordinators, cosmetologists, stylists, and cosmetology education professionals participated in this effort.

The goal of this Cosmetology skill standards project is to identify skill standards that reflect the cosmetology industry’s expectations for future trends, and which can be immediately used to:

- Improve work readiness of all cosmetologists
- Increase the cooperation between cosmetologists and cosmetology education
- Improve academic mobility by developing articulated curriculum that continues from high school through the community and technical colleges and on to four-year and cosmetology educational institutions
- Facilitate educational reform to match to work related requirements
- Establish criteria and standards for model cosmetology degrees
- Establish criteria and standards for continued competence among the professionals in cosmetology
- Establish criteria for employer effectiveness rating of employees

The continued economic competitiveness of the U.S. depends on closing the qualification gap between the knowledge and skills needed in today’s workplace and the current level of preparation of the workforce.

Organizations are moving from vertical to horizontal divisions of labor with a strong emphasis on teamwork. Their focus has shifted to functions and skills from narrowly defined job descriptions. Knowledge and skills in the workforce have become the key ingredients to success. In this changing workplace, workers must think critically, solve problems, communicate effectively, be flexible, and demonstrate a commitment to lifelong learning.

In view of the shift to an economy based on knowledge and information and the need for higher levels of skill within the workforce, education is challenged to restructure itself to prepare that new workforce. The majority of jobs created between now and the future will require some post-secondary education, yet more than half of young people leave school without the foundation skills to find and hold a good job (Workforce 2000).
Why Skill Standards?

Industrialized nations that have maintained their competitiveness are characterized by a well-established skill standards system. The declining economic competitiveness of the U.S. has caused government policy makers and educators to reevaluate existing approaches and to develop new strategies for workforce development. One of the responses was the enactment of the Goals 2000: Educate America Act. in 1994. This act established the National Skill Standards Board to provide leadership in the development of voluntary skill standards for the U.S. The School-to-Work Opportunities Act (1994) encourages states to develop skill standards and link them to national efforts.

As Robert B. Reich, former Secretary of Labor, and Richard W. Riley, Secretary of Education, have stated:

We are confident that over time, the National Skill Standards Board through this voluntary, industry-led system will contribute to the nation’s prosperity by helping to ensure the development of a high skill, high quality, high performance workforce from frontline workers to CEOs; enable industries to effectively communicate with training providers and prospective employees skill requirements for employment; provide employers with tools for evaluating the skill levels of job applicants and for training current employees; and provide labor organizations with tools to enhance employment security through the use of portable credentials and skills. For all levels of government, skill standards can be used to promote quality education and training programs to facilitate linkages with other national efforts aimed at enhancing workforce skills and to improve employment information. These include school-to-work transition projects, vocational technical education, job training programs and development of a comprehensive, common nomenclature for discussing skills and occupations.

Voluntary Skill Standards and Certification
U.S. Department of Labor

Voluntary skill standards provide the framework within which U.S. and businesses can build a competitive advantage in the global economy.

- Industry-identified skill standards will serve as a vehicle for companies and businesses to communicate their performance expectations for workers. Skill standards will provide a common framework for communication of workplace expectations between business, education, workers, students, and government.

- Voluntary cosmetology skill standards will facilitate the reform of education to match the curriculum to workplace requirements. Competency-based standards will assure the employability of students who have completed programs based on those standards. National recognition of skill standards in career fields will provide a common basis for certifying achievement against those standards, thereby allowing for the portability of skills across companies, state borders, and in individual careers.

- Cosmetology skill standards will close the qualification gap by linking the cosmetology industry’s expectations for knowledge, skills, and abilities to the education provided to students. Skill standards will provide workplace expectations, so students know what they need to be able to do to meet those expectations, workers understand what is expected to perform and advance in their field, and educators can discern the competencies on which curriculum is developed and to be able to document the competencies of their students.
What Are Skill Standards?

For cosmetology skill standards to be effective, they must reflect the consensus of cosmetology professionals. Voluntary skill standards establish the agreed-upon, industry-identified knowledge, skills, and abilities required to succeed in the workplace.

Voluntary, industry-based skill standards should be:

- Responsive to changing work organizations, technologies, and market structure.
- Based on broadly defined occupational categories within cosmetology.
- Benchmarked to world-class levels of industry performance and free from gender, racial, or other forms of bias.
- Tied to measurable, competency-based outcomes that can be readily assessed.
- Inclusive of basic reading, writing, and critical thinking skills.
- Useful for qualifying new hires and continuously upgrading employees’ skills.
- Comparable across dentistry, similar occupations, and states.
- Applicable to a wide variety of education and training providers, both work and school based.
- Based on relatively simple structure to make the system user-friendly.
- Applicable to a wide variety of education and training providers, both work and school based.
- A cooperative effort among all stakeholders.
- Developed independently of any single education/training provider or type of education/training provider.

National Alliance of Business

Skill standards provide benchmarks of skill and performance attainment that are behavioral and measurable. Skill standards answer two critical questions:

- What do cosmetology workers need to know and be able to do to succeed in today's workplace?
- How do we know when cosmetology workers are performing well?

Without this fundamental information, employers do not know whom to hire or how to evaluate employees, employees and new entrants to the dental workforce do not know what is expected of them, and educators do not know how to prepare students for the challenges of the workplace.
Who Benefits?

Cosmetology skill standards provide benefits to employers, educators, students and workers, and the government.

Cosmetology skill standards will enable employers to:

- Establish personnel qualification requirements.
- Design appropriate educational/training programs and measure their effectiveness.
- Assess employee skill levels based on cosmetology industry standards.
- Match employee skills to the work needed.
- Improve consumer confidence and satisfaction.
- Establish certification standards.
- Improve employee satisfaction and morale by clarifying expectations.
- More easily document employee skills, training needs, and performance quality.
- Improve quality, productivity, and competitiveness.

Cosmetology skill standards will enable educators to:

- Provide effective, targeted instruction.
- Develop benchmarks for competent students.
- Communicate what companies expect of employees.
- Develop new and evaluate existing curriculum and programs based on industry needs.
- Collaborate with industry using a common language.
- Improve relationships with local businesses.
- Provide students with relevant career education.
- Communicate effectively about education reform to parents, family members, and legislators.

Cosmetology skill standards will enable students and workers to:

- Obtain certification of their skills.
- Enter and reenter the workforce into higher skilled, higher paid jobs.
- Determine business’ expectations of the skills needed for career entry.
- Improve mobility and portability of their credentials.
- Earn higher wages, enjoy employment security, and expand job opportunities.
- Certify the level of competency gained through experience, school, or self-study.
- Enhance their current performance.
- Contribute to the success of their organizations.
- Accurately evaluate their skills against those required for career movement and advancement.
Cosmetology skill standards will enable government to:

- Assist in the development of a highly skilled, high-quality, and competitive workforce.
- Evaluate the effectiveness of publicly funded education and training.
- Increase opportunities for under-represented populations.
- Create high performance organizations in the U.S.
- Provide links with other national efforts, such as school-to-work, vocational and technical education, and job training.
- Facilitate the collaboration between education and business.
- Communicate the need and the basis for change to business, education, and the public.

Cosmetology professionals have been involved in the identification of skill standards in two career clusters. The two clusters are:

- Cosmetologist
- Salon Coordinator

Project Goals

- Identify cosmetology skill standards in two career clusters. These standards will serve as benchmarks for entry into cosmetology careers and professional levels.
- Disseminate the results and support their use by educators, cosmetology, related businesses, individuals, students, workers, and government agencies.

Guiding Principles

- Experienced workers are the experts in their career fields and are best able to identify the work performed and the skills, knowledge, and abilities required to be successful.
- Cosmetology and education must work as partners to ensure the link between the work expectations and the curriculum.
- Standards must be flexible and portable, and should be updated continuously.
- Cosmetology skill standards must be voluntary and adaptable to regional and local needs.
- Cosmetology skill standards describe the major functions and tasks, as well as the performance criteria, technical knowledge, tools, foundation skills, and attributes needed to perform those functions and tasks well.
- Integrated cosmetology skill standards define work duties and the skills required to perform these skills in the context of a wide variety of work settings.
The pyramid of competencies is a depiction of skill standards in three broad skill categories.

At the broadest level, Tier I, is the set of foundation skills, knowledge, abilities, and personal qualities required of all workers to be successful in today's workplace. These are the universal skills—problem solving, team skills, and flexibility—that are needed to apply technical knowledge and tools effectively.

Tier II—technical skills, knowledge, and abilities—are the skills common to all jobs within a cluster across all industries. For a Cosmetologist, for example, knowledge of safety requirements and procedures applies across all industries.

Tier III—industry-specific technical skills, knowledge, and abilities—are unique to individual jobs or clusters and are the most prone to rapid change. For example, a Cosmetologist's required knowledge of operational procedures and salon protocol may differ across businesses.

The Process of Integrating Skill Standards
Adapted from the Skill Standards Guidebook I and II

The Process of Building Skill Standards
Adapted from Skill Standards, Qualifications Systems, and the American Workforce

1. Research other standards projects and relevant literature.

2. Conduct DACUMs to identify job functions and tasks, and required skills, knowledge, and abilities.

3. Set performance criteria for tasks, indicating how we will know if the task is performed well.

4. Create problem scenarios using indicated skills, knowledge, and abilities.

5. Validate the standards
The Skill Standards Development Process

Cosmetology professionals have been involved in the identification of skill standards in two career clusters. The two clusters are:

- Cosmetologist
- Salon Coordinator

Project Goals

- Identify cosmetology skill standards in two career clusters. These standards will serve as benchmarks for entry into cosmetology careers and professional levels.
- Disseminate the results and support their use by educators, cosmetology, related businesses, individuals, students, workers, and government agencies.

Guiding Principles

- Experienced workers are the experts in their career fields and are best able to identify the work performed and the skills, knowledge, and abilities required to be successful.
- Cosmetology and education must work as partners to ensure the link between the work expectations and the curriculum.
- Standards must be flexible and portable, and should be updated continuously.
- Cosmetology skill standards must be voluntary and adaptable to regional and local needs.
- Cosmetology skill standards describe the major functions and tasks, as well as the performance criteria, technical knowledge, tools, foundation skills, and attributes needed to perform those functions and tasks well.
- Integrated cosmetology skill standards define work duties and the skills required to perform these skills in the context of a wide variety of work settings.

Identifying the Skill Standards

The DACUM (Developing a Curriculum) process used to identify the primary functions and tasks within each cluster consisted of day-long sessions with eight to fifteen IT professionals from each cluster.

Each DACUM participant was also asked to complete a survey instrument based on broad foundation skills, the ADVANCE™ Workplace Standards Skill Inventory from Advance Educational Spectrums, Inc.

The foundation skills on which this survey is based came from SCANS (Secretary’s Commission on Achieving Necessary Skills). Based on a report issued in 1991, SCANS identified workplace competencies and foundation skills required for all work. For each of the 37 SCANS skills, IT professionals were asked to identify which of the five levels of difficulty represented the appropriate skill level for their position.

Next, groups of IT professionals and educators developed performance criteria for each task. They answered the question: “How do you know when this task is performed well?” In addition, they described the tools, knowledge, and foundation skills required to do the task well. These questions were answered for each task in each of the eight clusters.
Work does not happen in a vacuum. Because the functions, tasks, knowledge, and abilities are applied within the problem solving and decision making that occurs during real work applications, these skills must be measured in the context of that work. Scenarios representing typical work situations were identified for each cluster. These scenarios described skill standards in work settings that clarified the decision-making and problem-solving context for the standard.

**Using Skill Standards to Assess Curriculum**

The quickest and least expensive implementation strategies for Skill Standards is to use the standard to assess curriculum to identify if employer needs and expectations are being met, and that they are embedded in the lessons. To assess curriculum, each task, drawn from select pages of the Skill Standard, is evaluated for the emphasis in the curriculum; where in the curriculum one might find the standard covered; a judgment on whether the lesson is competency-based; and an identification of the assessment methodology used to measure performance.

After the assessments are completed, curriculum reviewers can identify what priorities have a low degree of emphasis in the curriculum and make suggestions for improvement. The changes may include changes in how the lesson is taught, how the lesson is assessed, or how much time is spent on the lesson. Seldom, if ever, does the Skill Standard call for major re-design of the curriculum. Often more business related activities, more real world projects, more team assignments, and more authentic performance-based student assessments improve the relevancy of the curriculum design.

Description of the Position

As a cosmetologist you are responsible for serving the technical needs and expectations of your clients. It is your responsibility to educate and inform clients about the salon and all services and products offered. You will also have a working knowledge of attracting and retaining clients and be expected to maintain a strong client base.

In addition to performing technical duties, you will be responsible to stay current in your profession. You will be expected to attend technical and service oriented classes to maintain proficiency and professionalism.

You will be responsible for on-time time management; appropriate scheduling of clients is a critical element of your job.

You may also be required to handle cash transactions. You will be expected to maintain good accounting records and safekeeping for cash receipts.
Summary of Functions

A1 - SERVE CLIENTS
A1.1 Consult with clients to determine needs/preferences
A1.2 Conduct services in a safe environment and prevent the spread of infectious and contagious disease
A1.3 Implement time management strategies
A1.4 Develop and implement strategies to retain clients
A1.5 Assess customer satisfaction

B1 - PERFORM BUSINESS OPERATIONS
B1.1 Sell professional salon products to customers
B1.2 Maintain and assess income and expense records
B1.3 Update and maintain client records
B1.4 Perform inventory control
B1.5 Handle money transactions

C1 - PROVIDE SERVICES
C1.1 Safely use salon products while providing client services
C1.2 Provide basic skin care services
C1.3 Provide basic manicure or pedicure
C1.4 Apply appropriate cosmetics to enhance a client's appearance
C1.5 Perform a shampoo in preparation for hair treatments or styling
C1.6 Provide a haircut in accordance with client's needs/expectations
C1.7 Provide styling and finishing techniques
C1.8 Conduct a color service
C1.9 Perform hair relaxation and/or wave formation (perm) service
C1.10 Provide non-surgical hair additions
C1.11 Perform hair removal services

D1 - MAINTAIN PERSONAL/PROFESSIONAL GROWTH
D1.1 Take class/read publications to continue industry education
D1.2 Insure personal health and well being

E1 - PROBLEM SOLVE/TROUBLESHOOT
E1.1 Define problem
E1.2 Assess and determine impact to internal/external systems/processes
E1.3 Notify need to know personnel and/or clients
E1.4 Seek options and determine solutions
E1.5 Discuss solutions with all stakeholders and implement
E1.6 Assess outcome
E1.7 Develop and implement corrective preventive action plan, if needed

| E1.7 Develop and implement corrective preventive action plan, if needed | • Preventive action plan is developed to minimize recurrence of same or similar problem.  
• Preventive action plan is implemented into system where appropriate in a timely manner. | • Knowledge of bacteriology  
• Ability to demonstrate customer and personal service  
• Knowledge of infectious diseases and disorders  
• Knowledge of all applicable laws, codes and regulations pertaining to salons | • Ability to prioritize daily tasks  
• Ability to develop and apply creative solutions to new situations  
• Ability to visually analyze relationship between parts/whole  
• Ability to follow-up on assigned tasks |
Scenario 1

Your customer of three years walks in for an appointment. She tells the salon coordinator she doesn’t have a scheduled appointment and asks if you’re available. You inform her you just had a cancellation and can take her right now. You adjust your chair and begin discussing her needs. During the consultation, she informs you she wants a new style hair cut. She shows you a picture of what she has in mind. After you are clear on her needs and preferences and she has agreed, you proceed. After the haircut you style it using a new gel. She likes the volume it gives her hair and asks to purchase a tube.

Primary functions and tasks involved in this scenario:

A1 - SERVE CLIENTS
   A1.1 Consult with client to determine needs/preferences
   A1.2 Conduct services in a safe environment and prevent the spread of infectious and contagious disease
   A1.3 Implement time management strategies
   A1.4 Develop and implement strategies to retain clients

B1 - PERFORM BUSINESS OPERATIONS
   B1.1 Sell professional salon products to customers

C1 - PROVIDE SERVICES
   C1.1 Safely use salon products while providing client services
   C1.2 Provide a haircut in accordance with client’s needs/expectations

D1 - MAINTAIN PERSONAL/PROFESSIONAL GROWTH
   D1.2 Insure personal health and well being
Scenario 2

After consulting with the parent of a seven-year-old child, you begin cutting the child’s hair and realize she has lice. You politely and calmly suggest to the parent the child may have lice and inform them you must terminate the haircut. You explain the salon policy and the contamination problem lice poses to the salon and its clients. You direct them to a pharmacy to purchase the proper treatment. You then assure them after the child is free of lice, she may return for her haircut. You immediately begin to sterilize and sanitize all contaminated equipment and surfaces according to state regulations.

Primary functions and tasks involved in this scenario:

**A1 - SERVE CLIENTS**

- A1.1 Consult with clients to determine needs/preferences
- A1.2 Conduct services in a safe environment and prevent the spread of infectious and contagious disease

**E1 - PROBLEM SOLVE/TROUBLE SHOOT**

- E1.1 Define problem
- E1.2 Assess and determine impact to internal systems and processes
- E1.3 Notify need to know personnel and/or client
- E1.5 Discuss solutions with all stakeholders
Scenario 3

You are a new stylist with six months post school experience. Everyone else is busy in the salon but you. You are eating in the back room while reading the latest car magazines. The busiest stylist in the salon approaches you and asks why you aren’t busy. You blame it on the fact that you’re new. She begins to tell you about when she first started out and how she built her client base and how to retain clients. You have noticed her new car and you remember hearing about the great trip she was taking and what about the money she has tucked away in her 401K. She offers to assist you in developing some strategies to attract and retain clients, but it’s up to you to implement them. You agree. You notice a hair magazine on the rack in the lobby and read it. Inside, there is an announcement of an upcoming hair show in San Francisco to introduce and instruct stylists on the new hairstyles for the season. After researching it, you and a few of your co-workers decide to go.

Primary functions and tasks involved in this scenario:

A1 - SERVE CLIENTS
- A1.3 Implement time management strategies
- A1.4 Develop and implement strategies to retain clients

D1 - MAINTAIN PERSONAL/PROFESSIONAL GROWTH
- D1.1 Take class/read publications to continue industry education
We wish to thank the following committee members whose valued time, expertise and effort have contributed to the completion of this project.
