

Selected Programs

Enrollments in Selected Programs

The community and technical college system offers a wide variety of programs and tuition assistance opportunities. A selected set of these programs are reported in detail in this chapter. Such programs include the Applied Baccalaureate degrees, Integrated Basic Education and Skills Training, apprenticeship training and the Worker Retraining program.

Apprenticeship combines classroom studies with on-the-job training supervised by a journey-level craft person or trade professional. Apprenticeship enrollments have decreased 13 percent since 2006-07. Apprenticeship enrollments have declined for the third year in a row. The decrease results from fewer apprenticeship opportunities in a depressed economy, as well as from apprenticeship caps at some colleges in the face of fiscal constraints.

Seven colleges offered **Applied Baccalaureate** degrees during 2010-11 ranging in focus from nursing to interior design. Colleges began offering applied baccalaureate degrees in 2007. Seven colleges offer eight degree programs. State FTES increased by 78 (15 percent over the funded level). The number of FTES from all funding sources has increased 45 percent from the previous year, with 17 percent of those coming from self-support.

Nine colleges offer courses in correctional facilities under contract with the state's **Department of Corrections**. The number of inmates participating in the programs declined 8 percent in 2010-11. Unlike the previous year, the contract-funded FTES declined in addition to the headcount. Parenting programs at all locations and specific vocational programs were cut due to reductions in the budget.

Dual credit and High School Enrollment programs include Running Start, Alternative High School, College in the High School and Tech Prep. The Running Start program assisted 19,125 11th and 12th grade students to take college courses and earn both high school and college credit. The number of students participating in alternative high school programs offered at the colleges remained relatively flat at 3,617 students in 2010-11.

eLearning courses allow students to participate in learning by using digital and networked technologies inside or outside of the classroom. eLearning courses displace some or all of the face-to-face time of a traditional course. State-supported eLearning FTES have increased 75 percent over the past five years and now account for nearly 20 percent of all state FTES.

Integrated Basic Education and Skills Training (I-BEST) programs assist students in earning college-level professional-technical credits by integrating basic skills with workforce education. All colleges now offer at least one I-BEST program in which an instructor from basic skills and an instructor from the professional-technical program jointly instruct in the same classroom. There were 1,782 FTES from all fund sources. FTES were flat in 2010-11 after growing 52 percent the previous year.

International student instruction is both state and contract-funded. State-funded students pay non-resident tuition and come from a wide range of countries. In 2010-11, international student enrollments increased by 7 percent.

The **Opportunity Grant** program is designed to support and encourage low-income students to complete a degree or certificate by filling in funding gaps not addressed by existing financial aid programs. Colleges awarded Opportunity Grants to 5,411 students in 2010-11 who generated 3,816 FTES. This exceeded the legislative target of 2,089 FTES.

A **Worker Retraining** student is a dislocated worker enrolled in training to gain skills to re-enter the workforce. Worker Retraining FTES grew slightly in 2010-11 as the economy continued to worsen. In addition to the 13,403 state-supported FTES served by the community and technical colleges.

WorkFirst students enroll in college for short vocational training. Nearly 15,500 students participated in the WorkFirst program in 2009-10 and generated 7,416 FTES.

Students by Dual Credit and High School Enrollment Programs

Running Start is the largest dual credit program. It allows qualified 11th and 12th grade high school students to earn college credit while they finish high school. Running Start students enroll in courses offered to all students at the campus or through eLearning. **College in the High School** students take college level work at their high school. **Alternative High Schools** are high school programs contracted with school districts and offered on college campuses.

eLearning State-Supported FTES

eLearning courses enrolled 31,394 state FTES or 19 percent of all state FTES. Although pace of growth slowed, eLearning continued its growth pattern, increasing by 483 FTES or 1.6 percent. However, this was markedly less than the 66 percent growth over the previous two years.

Online learning, with no face-to-face instruction, is the most popular form of eLearning, comprising 65 percent. Online learning increased by 401 state FTES, or 2 percent.

Hybrid courses combine online with some face-to-face coursework. These courses continued to grow. In 2011, they increased by 1,067 state FTES or 12 percent.

Students Receiving Need-Based Financial

Some 200,000 state support students were enrolled in programs which make them eligible for aid. Of those enrolled in programs eligible for aid, 46.6 percent received state or federal aid.

Not all low-income students are eligible for aid. Financial aid programs were developed in the 1950s and 1960s primarily designed for students coming straight from high school. To receive aid, students must have financial need and be enrolled in a college-level program of study. Adult Basic Education or English as a Second Language classes are not eligible for aid. Students enrolled in one or two courses to upgrade job skills or meet personal interests likewise are not eligible for aid.

Students seeking aid in paying for college costs must apply to the financial aid office at the college. Those who apply may be eligible for loans, work study or grants, as well as scholarship programs, though most are eligible for and receive grants. The demand for grants and work study aid typically exceeds the funds available. This means that students must work to reduce expenses, find employment, or take out personal loans to fund the balance of their college expenses.

FTES by Course Location and Time

Enrollments grew slightly in courses held on campus during the day during the 2010-11 academic year, serving record enrollments. eLearning, excluding hybrid courses, decreased by 2.8 percent for the first slow down in growth in FTES in years. However, 13 percent of state-supported courses are offered on-line. About 70 percent of all state-supported courses are offered during the day on-campus. All other locations and evening offerings declined 3 percent as colleges consolidate due to fiscal constraints.
