

Selected Programs

Enrollments in Selected Programs

The community and technical college system offers a wide variety of programs and tuition assistance opportunities. A selected set of these programs are reported in detail in this chapter. Such programs include the Applied Baccalaureate degrees, Integrated Basic Education and Skills Training, apprenticeship training, and the Worker Retraining program.

Apprenticeship combines classroom studies with on-the-job training supervised by a journey-level craft person or trade professional. Apprenticeship enrollments have decreased 44 percent since 2006-07. Apprenticeship enrollments have declined for the fourth year in a row. The decrease results from fewer apprenticeship opportunities in a depressed economy, as well as from apprenticeship caps at some colleges in the face of fiscal constraints.

Seven colleges were approved to offer eight **Applied Baccalaureate** degree programs during 2011-12 ranging in focus from nursing to interior design. Colleges began offering applied baccalaureate degrees in 2007. State FTES increased by 53 (34 percent over the funded level). The number of FTES from all funding sources was 437, with 13 percent of those coming from self-support by way of non-matriculated students.

Eight colleges offer courses in correctional facilities under contract with the state's **Department of Corrections**. The number of inmates participating in the programs declined 7 percent in 2011-12 while FTES went down 10 percent. In 2011-12, the Department of Corrections introduced a new educational referral guide which reflects their new philosophy of getting the right offender in the right program focusing mainly on high-risk-to-reoffend offenders. The old philosophy was that all offenders receive some services. The end result is that fewer offenders receive educational services, but those that are in educational programs have higher intensity levels.

Dual credit and High School Enrollment programs include Running Start, Alternative High School, College in the High School, and Tech Prep. The Running Start program assisted 18,604 11th and 12th grade students to take college courses and earn both high school and college credit. The number of students participating in alternative high school programs offered at the colleges decreased 4 percent to 3,481 students in 2011-12.

eLearning courses allow students to participate in learning by using digital and networked technologies inside or outside of the classroom. eLearning courses displace some or all of the face-to-face time of a traditional course. eLearning FTES have increased 72 percent over the past five years and now account for nearly 20 percent of all FTES.

Integrated Basic Education and Skills Training (I-BEST) programs assist students in earning college-level professional-technical credits by integrating basic skills with workforce education. All colleges now offer at least one I-BEST program in which an instructor from basic skills and an instructor from the professional-technical program jointly instruct in the same classroom. There were 1,674 FTES from all fund sources. FTES declined by 6 percent in 2011-12 after flat growth the previous year.

International student instruction is both state- and contract-funded. State-funded students pay non-resident tuition and come from a wide range of countries. In 2011-12, international student enrollments increased by 12 percent.

The **Opportunity Grant** program is designed to support and encourage low-income students to complete a degree or certificate by filling in funding gaps not addressed by existing financial aid programs. Colleges awarded Opportunity Grants to 5,159 students in 2011-12 who generated 3,649 FTES. This exceeded the legislative target of 1,842 FTES.

A **Worker Retraining** student is a dislocated worker enrolled in training to gain skills to re-enter the workforce. Worker Retraining FTES dropped 12 percent in 2011-12 largely due to a discontinuation of special funding for the program appropriated by the legislature in July 2011.

WorkFirst students enroll in college for short vocational training. About 11,700 students participated in the WorkFirst program in 2011-12 and generated 5,857 FTES.

Students by Dual Credit and High School Enrollment Programs

Running Start is the largest dual credit program. It allows qualified 11th and 12th grade high school students to earn college credit while they finish high school. Running Start students enroll in courses offered to all students at the campus or through eLearning. **College in the High School** students take college-level work at their high school. **Alternative High Schools** are high school programs contracted with school districts and offered on college campuses.

eLearning FTES - All Funds

eLearning courses enrolled 38,992 total FTES or 20 percent of all FTES. The pace of growth was greater in 2010-11 than in the two years prior, although it was a minor 2.6 percent, or 990 FTES.

Online learning, with no face-to-face instruction, is the most popular form of eLearning, comprising 66 percent. Online learning increased by 590 state FTES, or 2.3 percent.

Hybrid courses combine online with some face-to-face coursework. These courses continued to grow, increasing by 1,028 state FTES or 9 percent in 2011.

Students Receiving Need-Based Financial Aid

Approximately 193,000 state support students were enrolled in programs which make them eligible for aid. Of those enrolled in programs eligible for aid, 48.3 percent received state or federal aid.

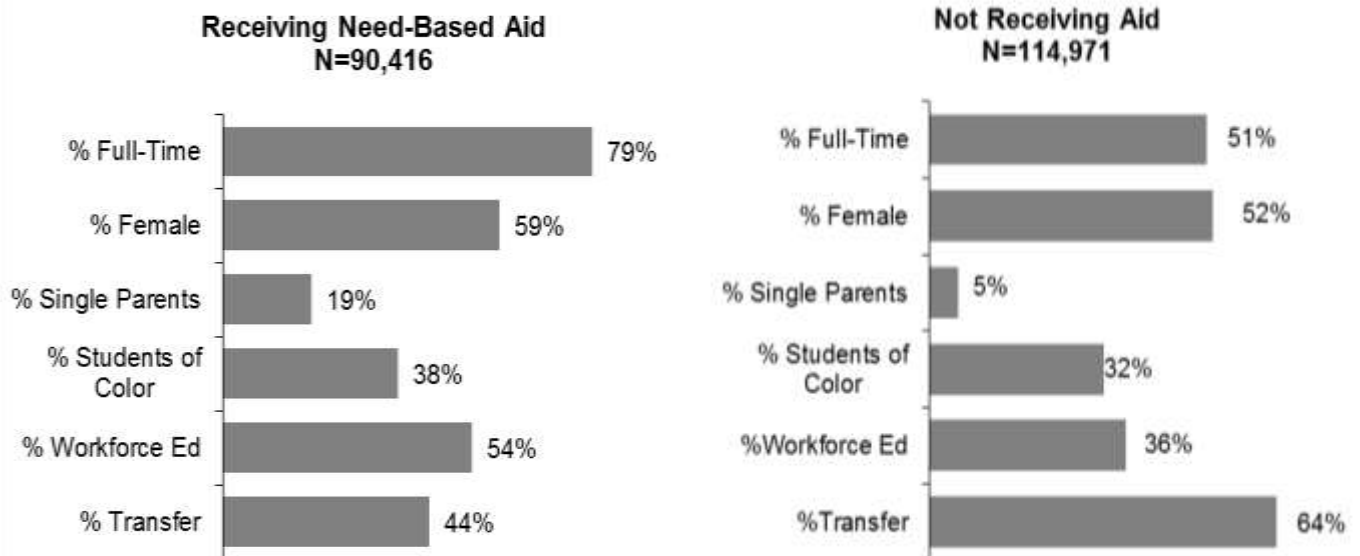

Not all low-income students are eligible for aid. Financial aid programs were developed in the 1950s and 1960s primarily designed for students coming straight from high school. To receive aid, students must have financial need and be enrolled in a college-level program of study. Adult Basic Education or English as a Second Language classes are not eligible for aid. Students enrolled in one or two courses to upgrade job skills or meet personal interests likewise are not eligible for aid.

Students seeking aid in paying for college costs must apply to the financial aid office at the college. Those who apply may be eligible for loans, work study or grants, as well as scholarship programs, though most are eligible for and receive grants. The demand for grants and work study aid typically exceeds the funds available. This means that students must work to reduce expenses, find employment, or take out personal loans to fund the balance of their college expenses.

FTES by Course Location and Time

Enrollments in courses held on campus during the day dropped by over 5 percent during the 2011-12 academic year. eLearning (excluding hybrid and web-enhanced courses) decreased by 1.7 percent from the prior year. All other locations and evening offerings declined the most at 8.4 percent as colleges continued to consolidate due to fiscal constraints. The majority of all state-supported courses are offered during the day on-campus (71 percent of total). eLearning that is 100 percent online is the least common course attendance option at about 14 percent.
