

Selected Programs

Enrollments in Selected Programs

The community and technical college system offers a wide variety of programs and tuition assistance opportunities. This chapter details selected programs such as applied baccalaureate, Integrated Basic Education and Skills Training (I-BEST), apprenticeship, and Worker Retraining programs.

Apprenticeship combines classroom studies with on-the-job training supervised by a journey-level craft person or trade professional

Applied Baccalaureate Programs were first approved for the system in 2007. Nineteen colleges offered 45 applied baccalaureate degree programs during 2015-16.

Eight colleges offer courses in correctional facilities under contract with the state **Department of Corrections**. In 2011-12, the Department of Corrections introduced a new educational referral guide to reflect its new philosophy of “getting the right offender in the right program,” focusing mainly on high-risk-to-reoffend inmates. The end result of the new policy is that, while fewer offenders receive educational services, those in educational programs get instruction at a higher level of intensity.

Dual credit and High School Enrollment programs include Running Start, Alternative High School, and College in the High School.

eLearning courses allow students to participate in learning by using digital and networked technologies inside or outside of the classroom. eLearning courses displace some or all of the face-to-face time of a traditional course.

I-BEST programs assist students in earning college-level professional-technical and transfer credits by integrating basic education and developmental education with workforce and transfer education. I-BEST programs have either a basic or developmental education instructor and either a workforce or academic transfer instructor providing instruction together in the same classroom.

International Student instruction is both state- and contract-funded. State-funded students pay non-resident tuition and come from a wide range of countries.

The Opportunity Grant program is designed to support and encourage low-income students to complete a degree or certificate by filling in funding gaps not addressed by existing financial aid programs.

The Worker Retraining Program provides education and training to unemployed or dislocated workers to help them re-enter the workforce.

The WorkFirst program provides workforce education and training to low-income single parents.
