

Students Served: Demographics

Gender and Disability Status of Students Served

Male/Female: In fall 2013, majority (57 percent) of all students in Washington community and technical colleges were female. The percent of male students has continued to level off since an increase in 2009 due to the recession.

GENDER OF STATE SUPPORTED STUDENTS IN FALL

| | 2009 | 2010 | 2011 | 2012 | 2013 | % Change from 2012 |
|---------------|---------|---------|---------|---------|---------|-----------------------|

Source: SBCTC data warehouse.

Note: Unreported students were prorated based on percent of female.

Students with Disabilities: Colleges offer special services to ensure disabled students are able to participate in college-level training. Students with disabilities were 6.4 percent of total headcount in fall 2013. Students with learning disabilities are the largest category at 37 percent of all students with disabilities.

Source: SBCTC data warehouse Race Ethnic Indicator. Excludes International Students.

Note: Students may be counted in up to two race categories and thus the percent of total slightly exceeds 100 percent and the total headcount will not match headcounts reported elsewhere in this report.

Race and Ethnic Background of Students Served Including the Multi-Race Categories

Race and Ethnic Background: Community and technical college students are more diverse than the state population. In fall 2013, 41 percent of students reported their race or ethnicity as non-white compared to the state population estimate of 28 percent.

The below table further details how students (exclusive of international students) reported their race and ethnic backgrounds. It shows the increasing number of students reporting two race and ethnic categories.

| STUDENTS BY RACE AND ETHNIC BACKGROUND STATE SUPPORTED | | | | | | % Change from 2012 |

Source: SBCTC data warehouse by Kind of Student and Race Ethnic Indicator using sum of those with Race Ethnic Code reported excluding international students at the divisor. Students are reported in up to two reported race ethnic categories.

Note: Percent of total will not sum to 100 percent as a student may be counted in two race categories in the numerator though the denominator counts each student only once.

Age of Students Served

Age: The median age of students in fall 2013 was 26; meaning, half the students are over the age of 26. The distribution of all age groups remained consistent between 2012 and 2013.

Note: Data for students with age reported only.

Age of Students Served (cont.)

As in past years, younger students were far more likely to enroll with a transfer goal than older students, who were more likely to enroll for workforce education. Students who enrolled with a basic skills goal were nearly equally represented across the age spectrum.

Transfer Students: State-supported transfer students tended to be younger (median age of 21.4). Transfer students younger than 20 years have decreased slightly each year since 2009. This trend is consistent with population projections showing that this age group will plateau and then decline through 2015. There was a decrease in each age group, with the largest decrease in the 40-44 age group.

Age of Students Served (cont.)

Workforce Education Students: A typical workforce student had a median age of 28 in fall 2012, about seven years older than the typical transfer student. There was slight growth in lowest age group (under 20) and moderate growth in the highest age group (65 and older) between fall 2012 and fall 2013.

Entering Educational Status of Students

Educational Background: The majority of new transfer and workforce students typically enter college with little or no prior college experience. In fall 2013, three-fourths (76 percent) of new transfer students had a high school education at most, but no college. Another 19 percent had some college, but no degree. Five percent already had an associate or bachelor's degree or higher. These students likely enrolled for math, statistics or other course requirements needed to take their education to the next level.

Workforce students starting in fall 2013 were also very likely to have little prior college. Over three-fourths (83 percent) started with, at most, some college-level experience. Over half (61 percent) had a high school education, but no college. Eighteen percent had an associate degree or higher. These students frequently return for job-specific skills, or to retrain for entirely new fields such as nursing.

New Transfer Students by Planned Length of Attendance

Many state-supported students enroll at community and technical colleges each year to explore the transfer option. In fall 2013, 20,099 new students started college with a transfer goal. Over half (52 percent) of new fall transfer students plan to complete a degree at their college before they transfer, a 1 percent decrease from the previous year.

New Workforce Students by Planned Length of Attendance

In fall 2013, the overall number of new workforce students continued to decline after the highest total in fall 2009. This decline is likely due to the decrease in Worker Retraining funding available for workforce students as well as the continuously declining seat availability for new students, who have the lowest priority registration. It is also likely impacted by the exhaustion of unemployment insurance and the improving job market. The distribution of those seeking a degree decreased slightly to 51 percent.
